

SEABEE

ABOUT US

SSR Mining's **Seabee Gold Operation** has been in production since 1991 and is the only operating underground gold mine in Saskatchewan. All ore is processed on-site at the Seabee mill facility and produced into gold doré bars which are shipped to a third party refinery. Access to the mine site is by fixed wing aircraft with the exception of a 60-km winter ice road used typically from January through March to transport equipment and large supplies.

At Seabee, we value our people and invest in their growth and development. Our people's safety and well-being is key to our success. We offer a generous benefits package which includes a medical, dental and vision plan, a registered retirement savings plan and employee share purchase plan – both with employer contribution, leaves of absence, incentives and much more!
